

Traditional DSX-1 Systems

Copper :: 8 to 112 Terminations, Front and Rear Cross-Connect or Wall-Mount

Overview

Telect traditional DSX-1 panels provide essential connectivity in configurations that fit legacy installations and help to increase termination density. With a comprehensive range of options available, there's a Telect traditional DSX-1 panel for virtually any application or standard.

Primary Benefits

- Total front access, front or rear cross-connect
- Domino faceplate design simplifies jack access
- Segregated I/O fields and short path wiring help prevent crosstalk
- Dedicated Digital Jack™ ensures signal integrity
- Reversible mounting brackets fit 19-inch and 23-inch equipment racks, EIA or WECCO
- Lower capacities (8, 12, 28, 32 terminations) for low circuit count applications
- 112-circuit panel available for ultra high density
- Standard footprint panels provide a quality vendor alternative for legacy installations
- Backed by Telect's DSX lifetime warranty

Applications

- High-density central office connectivity – bay lineups
- Low circuit count remote applications – individual panels
